Þetta er þú þú þú þú þú

Better regulation:

- to make EU law simpler and to reduce regulatory costs, thus contributing to **a clear, stable and predictable regulatory framework** supporting growth and jobs.
- Regulation should be easy to implement, provide **certainty and predictability** and it should avoid any unnecessary burden.
- Better regulation is not about "more" or "less" EU legislation
- Should better regulation aim at more?

Better regulation and legal protection

Changes in regulatory approaches have consequences for legal protection.

- Programmatic approach
- 'Easy to comply with'-regulation

Monitoring results are a handhold for the courts in disputes about programmes, decisions about enforcements etc.
